

Respected HOD

I sincerely apologize for my low attendance record in the Research Lab, which currently stands at 57%. The primary reason for this shortfall is that I had already completed the required work and objectives assigned in the lab earlier. After completing the necessary tasks, I did not attend further sessions, which unfortunately reduced my attendance percentage.

I assure you that this was not out of negligence but due to the perception that my work requirements had been fulfilled. I truly value the importance of lab participation and regularity, and I regret not seeking clarification beforehand.

I kindly request your understanding of my situation and consideration of my genuine effort in completing the required lab work. Going forward, I will ensure proper communication and regular attendance in all academic activities.

Thank you for your understanding and support.

Respectfully,
Nikunj Vaghasiya
